Welcome to the Intelligence Community (IC) Defense Information Infrastructure Common Operating Environment (DII COE) Electronic Asset Distribution Services (EADS) Web site. The Joint Deployable Intelligence Support System Joint Program Office (JDISS JPO) has been established as the central facility for distribution of DII COE software to the Intelligence Community. Serving as the principal DII COE Asset Distribution interface between the Department of Defense Intelligence Information System (DoDIIS) Management Board (DMB), the Unified Commands, Armed Services and Combat Support Agencies, the IC EADS provides centralized distribution, configuration management (CM), and license management of Defense Information System Agency (DISA) developed DII COE segments, segmented Intelligence Mission Applications (IMA's) and DMB approved configurations for the Intelligence Community.

This Web site serves as a registration and entry point for the DoDIIS software repository. It also contains pertinent information about the repository and the DII COE environment.

DII COE Asset Distribution
Office of Naval Intelligence

Responsibilities

- DoDIIS Distribution Facility
- DoDIIS SIMO
- DoDIIS Test Facility
- Program Manager
- Sites

DoDIIS Distribution Facility

- Shall provide the Intelligence organizations “one stop shopping” for DMB approved products.
- Shall provide single POC with DISA for DII COE software deliveries

DoDIIS Distribution Facility

- Shall provide electronic software delivery capability
- Shall maintain DoDIIS Asset Repository
- Shall coordinate license management issues with DIA/DS Technical Acquisition

DoDIIS SIMO

- Shall be the final authority on DoDIIS Asset Repository user account types.
- Shall develop and maintain the currency of individual site SIMOs or DRB representative's with account validation authority.
- Shall provide DDF written notification of Certificate to Field for DMB managed software assets.

Ref: DoDIIS Instructions 2000, section 5.2, DF2

DoDIIS Test Facility

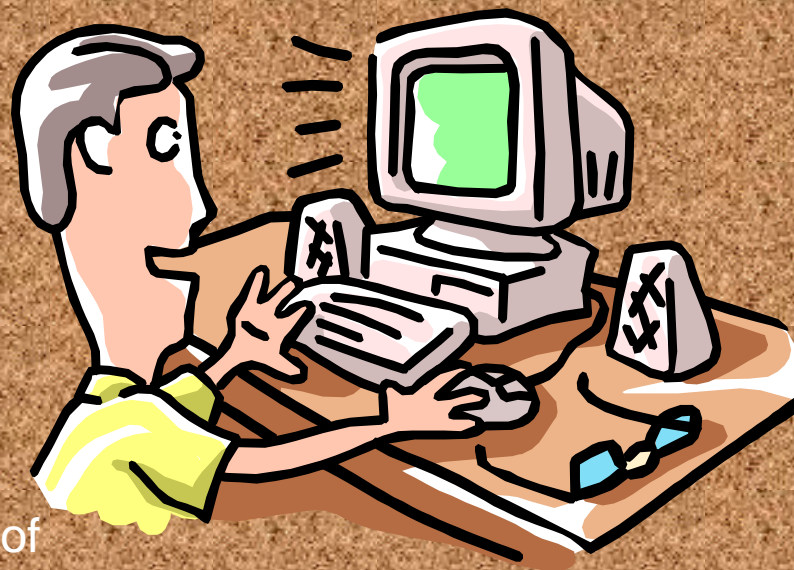

- Perform compliance testing of the COE kernel and segmented IMAs to determine DII COE compliance levels and verify that segments:
 - Work correctly within the COE runtime environment
 - Do not adversely affect one another
 - Conform to standards and specifications described in the DII COE I&RTS
 - Have been validated by the COE tools
 - Can be installed on top of the COE by the COE installation tools

Ref. DoDIIS Instructions 2000, section A.4, TF1

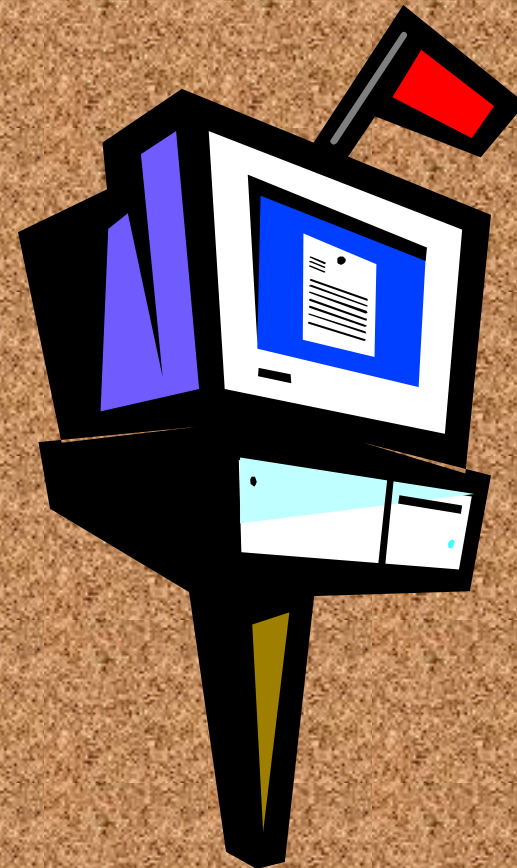

DoDIIS Test Facility

- Identify and document IMA functional duplication for the DMB
- Test IMAs against the approved DoDIIS DII COE baseline
- Verify IMA compliance with the DoDIIS Instructions
- Review no-test-required versions of IMAs for forwarding to the DoDIIS Asset Repository and for inclusion into the JITF test bed

DoDIIS Test Facility

- Shall deliver DMB approved IMAs, Configuration Definitions, and associative documentation to the DoDIIS repository.

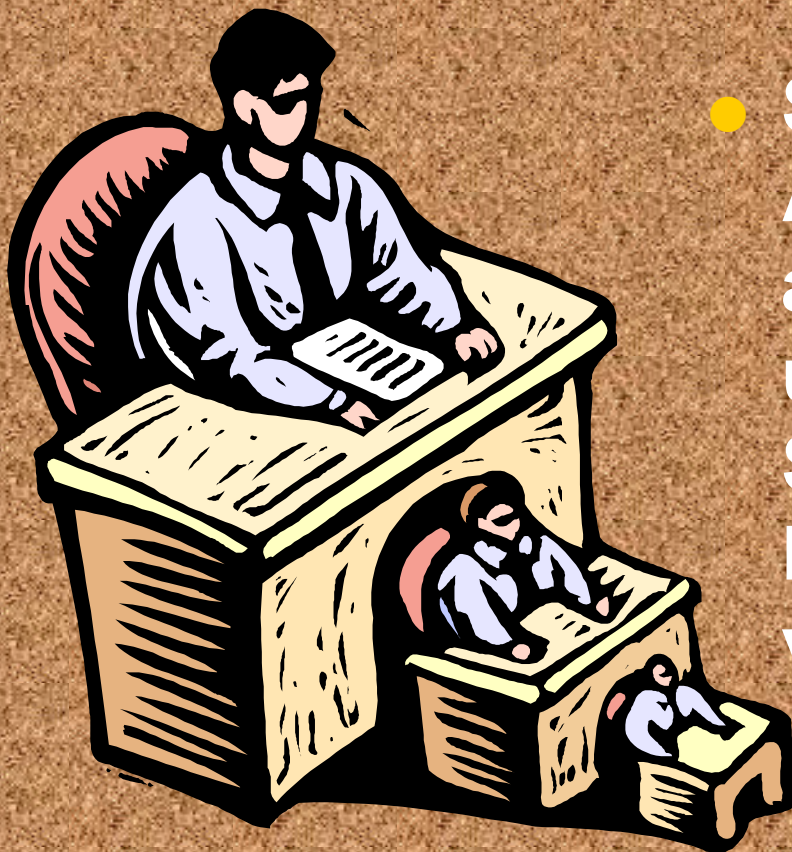

Program Managers

- Shall obtain DoDIIS baseline software only from the DoDIIS Asset Repository
- Shall refer all user requests for software to the DDF
- Shall deliver IMAs, configuration definitions, documentation only to DoDIIS Test Facility

Individual Site SIMOs *or* DRB representatives

- Shall validate DoDIIS Asset Repository account requests for users at sites under the SIMO (or equivalent) or DMB representative venue

Ref: DoDIIS Instructions 2000, section 5.2, DF5

Sites

- **Sites shall apply for access to the repository via the registration form on the EADS section of the JDISS web site.**
- **Shall provide the DDF with proof of purchase for vendor licensed software assets.**
